

Your territory for growth

Today, Casablanca Aeropole at Nousseur represents an industrial platform open to local and international investors including aircraft manufacturers, suppliers, design subcontractors and others. Located thirty kilometers south of Casablanca, it groups a wide variety of specialized skills and concentrates a number of significant benefits to the aeronautical industry.

This industrial and logistics platform is open to all industries and services to which the closeness and the use of the airfield represents a significant added value with access to multimode transportations, putting Europe, America and Africa at your reach by air road, train and sea.

A technological and industrial business park, of over 700 acres, immediately adjoining Casablanca Mohammed V airport, Aeropole offers priority access to regional business flights and merchandise transport. It also offers several mutual services (security, cleaning, etc) to help you concentrate on your business development.

Moreover, Aeropole has adopted a genuine welcome policy, by acting as an efficient facilitator, offering advice and assistance in all administration operations you will need to set up your business in the best conditions and shortest timeframes. Aeropole is your interface with the Moroccan administration.

Concerned by environment protection and determined to achieve sustainable development, Aeropole offers a unique opportunity to corporate entities sharing these values. It favors a tremendous momentum with existing corporations and guarantees the permanent support of a major institution namely Office National Des Aéroports, the Moroccan Airports Authority.

Aeropole has already attracted many famous international companies such as Boeing, Labinal, EADS Aviation, Safran Group and Dassault Aviation, etc.

The Casablanca Aeropole, is your Partner for Development.

Abdelhanine BENALLOU
Head of The Moroccan
National Airports Authority

AEROPOLE

COMPETITIVENESS and PRODUCTIVITY OPTIMIZATION

Casablanca Aeropole is an industrial and logistics park capable of adding high value to aeronautic industry and services. Located around the most important airport platform of the Kingdom, Casablanca Aeropole presents a fully equipped environment supporting production, services and training activities where utility necessary to evolution and development is provided. This area holds the advantage of multimodal transportations : Airplane, Train and Truck, making all production units no more than two hours far from Europe.

Casablanca Aeropole offers six different areas reserved to aircraft and space industry, as well as a life center :

-  **AERONAUTICAL INDUSTRY AREA** : Completely dedicated to aeronautical industry where companies operate in a productive synergy with their sub-contractors.
-  **AERONAUTICAL SERVICES AREA** : Dedicated to service activities support and research.
